Project

M.Tech Thesis (Ongoing)

Title	*Energy efficient routing algorithm for wireless sensor network*
Description	The main objective of this project is to propose a wireless sensor network routing protocol that consumes less power in data transmission than existing protocol.

M.Tech Mini Project (1st yr.)

Title	*NITC Election System*
Description	The NITC Election System provides the full functionality of creating and conducting the online election within the NITC. It also provides the feature of online nomination, withdraw, validation, support and result declaration. This application publishes the result as soon as election over and reduces the manpower needed for the various tasks.

B.Tech Project

Title	*Crime Reporting System*
Description	The Crime Reporting System is a web application that is developed in Php&MySql.The Crime Reporting System provides the easy and efficient way for lodging and tracking FIR(First Information Report). It solves the issue of delay in lodging FIR.
